

Training Registration and Certification App

Client Profile

A Malaysian Government agency that handles driving and funding training and development initiatives through various registered training institutes to improve workforce skills and capabilities across the country.

Challenge

The agency faced operational challenges with regards to the extensively manual process involved in candidate training registration, certification, feedback and payment to training institutes. This resulted in lack of visibility into training funds and made report generation on training attendance, performance and payments a cumbersome task.

Solution

The agency partnered with iLeap to build a training registration and certification management app that helped automate entire process from candidate registration, attendance to feedback across different training programs and institutes. The payment to the training institutes was also automated based on the number of attendees. Training program report generation was digitized to track attendance and quality. The App was also integrated with Google Maps to display Training Centre locations, active training sessions and number of participating candidates.

Benefits

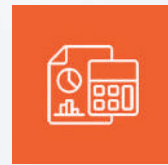

The App built for the Malaysian Government agency helped the management manage their training funds with more efficiency. The App offered manifold benefits to the organization.

IMPROVED INTERNAL OPERATIONS

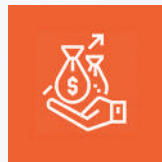

REDUCED TIME FOR REGISTRATION

AUTOMATED REPORT GENERATION

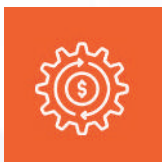

EASY TRACKING OF CURRENT TRAININGS

GREATER VISIBILITY INTO FUNDS AVAILABLE

TRACKING OF TRAINING FEEDBACK AND QUALITY

AUTOMATED PAYMENTS TO TRAINING CENTERS

COST EFFECTIVE APPROACH TO TRAINING MANAGEMENT
